

tracing_digits

ENG

There are some actions that we, as human beings, don't notice as we perform. Being in the smartphone era, we scroll through a lot of content everyday without being conscious of the act itself – exactly like when we walk or breathe.

We can then acknowledge that it is something volatile.

This project attempts to tackle something volatile by freezing the gesture on a tangible object.

How far have you scrolled today?

ITA

Ci sono azioni di cui noi esseri umani non ci rendiamo conto nel momento in cui le eseguiamo. Nell'era degli smartphone scorriamo ogni giorno un'enorme quantità di contenuto senza esserne coscienti – proprio come mentre camminiamo o respiriamo.

Scorrere contenuto è quindi qualcosa di volatile.

Questo progetto tenta di far permanere il gesto dell'utente su un oggetto tangibile.

E tu quanti metri hai 'scrollato' oggi?

Instructions

1. Scan the first QR Code to automatically connect to wifi.

2. Scan the second QR Code to start the experience.

Any problems?

If the QR codes do not work, connect to

wi-fi: tracing_digits
pass: tradigits

and go to this address
in your web browser
